

India is the cradle of human race, the birthplace of human speech, the mother of history, the grand mother of legend and the great grand mother of tradition. All the great global values in the history of man are treasured up only in India. In the same way the members of board at Dr. Kantipudi Vijay Laxmi Educational Society lay down plans of growth of the institution as pinnacle in Education sector.

In this endeavour we have started our flagship venture VIJAYAM TECHNO SCHOOL at Madhurawada. The execution of academic plan is headed by Dr. K. Vijaya Lakshmi, the Director of the Institute with her vast experience. She facilitates various departments to materialize the VISION of the Educational Society.

VIJAYAM is our Motto

VIKAASAM is our Techno

SAADHANAM is our Demo

SAAPHALYAM is our School's Logo

A NAME YOUR CHILD WOULD LOVE TO GROW WITH

From the point of view of future careers a student's learning time is mainly divided into two phases. The child derives the experience from parents and elders at home and from teachers at school. The child's character is strongly shaped from these interactions. Children should learn to enjoy their friend's success, to be confident when faced with a challenge and to be committed when putting in hard work during the academic year. This will help children to find happiness in whatever situation they are placed in. They will learn to respond positively to every experience in life.

A PROMISE OF QUALITY EDUCATION

Those who educate children well are to be more honoured than their parents. The parents only give life whereas the teachers teach the students the art of Living. Books are not just 'Pages', they implant images. Step by step, word by word, In our mind, a new concept grows! Child by child, class by class, In every student, the learner grows, How our zeal owes to their competence Not just knowledge, they shower their caring, They bring discipline and teach student sharing With love and respect, they fill every heart, And make every student learn every art.

Mr. & Miss. VIJAYAM - 2016

HERE QUALITIES OF LIFE ARE NURTURED WITH PATIENCE

Teachers play an important role in the life of children. From the first hesitant step in the lower nursery till the confident eighteen years old that goes into the world outside, the entire journey is a learning experience in which teachers provide guidance to help these tender buds blossom into gorgeous flowers that spread their fragrance around them. Our teachers will help these young learners to enjoy learning, teach them to find joy in all that they do and learn from experience. As teachers in our school they teach the students to learn to assess situations, face them objectively, and tackle them with maturity and find solutions that leave no bitterness around them.

BUILDING CONFIDENCE

FAITH supports in building confidence. It works as the sunshine on the flourishing crops of thoughts. The ability of a teacher in our school imparts the right amount of correct knowledge enhance the potentiality of the students. The qualitative knowledge of our teachers build up confidence among the students. We carefully nurture the right thoughts among the students and slowly build up confidence on the stable foundation of faith, understanding and self effort. The aim of our school is to develop concept clarity and subject specific skills, competencies like critical thinking, collaborative working and independent learning, to provide teachers with a rich resource for stimulating and meaningful teaching learning experiences. In addition we wish to strengthen our teacher training programmes holding subject and technology focused workshops at different levels.
